Author Index

Aartsma, T.J., see Deinum, G. (1099) 81
Aasa, R., see Haddy, A. (1099) 25
Allison, W.S., see Mileykovskaya, E.I. (1099) 219
Allison, W.S., see Noer, A.S. (1099) 123
Amesz, J., see Deinum, G. (1099) 81
Amesz, J., see Kleinherenbrink, F.A.M. (1099) 175
Andersson, B., see Carlberg, I. (1099) 111
Anthony, C.
The *c*-type cytochromes of methylotrophic bacteria (1099) 1
Antonov, V.F., see Bulychev, A.A. (1099) 16
Austin, P.A., Ross, I.S. and Mills, J.D.
Light/dark regulation of photosynthetic enzymes within intact cells of the cyanobacterium *Nostoc* sp. *Mac* (1099) 226

Bakou, A., Buser, C., Dandulakis, G., Brudvig, G. and Ghanotakis, D.F.
Calcium binding site(s) of Photosystem II as probed by lanthanides (1099) 131
Barber, J., see Shipton, C.A. (1099) 85
Beddard, G.S., see Heathcote, P. (1099) 267
Bingsmark, S., see Carlberg, I. (1099) 111
Boekema, E.J., see Tsuprun, V.L. (1099) 67
Bolhuis, P.A., see Van den Bogert, C. (1099) 118
Bragg, P.D., see Sedgwick, E.G. (1099) 45
Bragg, P.D., see Sedgwick, E.G. (1099) 51
Brain, A.P.R., see Williams, W.P. (1099) 137
Braun, G., Driesenaar, A.R.J., Shalgi, E. and Malkin, S.
Manipulation of the imbalance for linear electron flow activities between Photosystems I and II of photosynthesis by cyclic electron flow cofactors (1099) 57
Bredenkamp, G., see Hanley, J.A. (1099) 152
Briantais, J.-M., see Cerović, Z.G. (1099) 247
Brudvig, G., see Bakou, A. (1099) 131
Bulychev, A.A., Antonov, V.F. and Schevchenko, E.V.
Patch-clamp studies of light-induced currents across the thylakoid membrane of isolated chloroplasts (1099) 16
Buser, C., see Bakou, A. (1099) 131

Caldwell, W.S., see Kubrina, L.N. (1099) 233
Carlberg, I., Bingsmark, S., Vennigerholz, F., Larsson, U.K. and Andersson, B.
Low temperature effects on thylakoid protein phosphorylation and membrane dynamics (1099) 111
Carr, N.G., see Heathcote, P. (1099) 267
Cerović, Z.G. and Briantais, J.-M.
The influence of diphenylcarbazide and hydrazobenzene on the binding of the herbicide chlorotoluron to isolated thylakoids (1099) 247
Christensen, H.E.M., Conrad, L.S. and Ulstrup, J.
Effects of NO_2-modification of Tyr83 on the reactivity of spinach plastocyanin with cytochrome *f* (1099) 35
Conrad, L.S., see Christensen, H.E.M. (1099) 35
Cornelissen, J.C., see Van den Bogert, C. (1099) 118

Dandulakis, G., see Bakou, A. (1099) 131
Deinum, G., Kleinherenbrink, F.A.M., Aartsma, T.J. and Amesz, J.
The fluorescence yield of *Rhodopseudomonas viridis* in relation to the redox state of the primary electron donor (1099) 81
Deinum, G., see Kleinherenbrink, F.A.M. (1099) 175
Dekker, H.L., see Van den Bogert, C. (1099) 118
Dekker, J.P., see Kwa, S.L.S. (1099) 193
Dominy, P.J., see Williams, W.P. (1099) 137
Driesenaar, A.R.J., see Braun, G. (1099) 57
Dunham, W.R., see Haddy, A. (1099) 25

Evans, M.C.W., see Hanley, J.A. (1099) 152

Fraser, D.M., Zakeeruddin, S.M. and Grätzel, M.
Mediation of glycosylated and partially-deglycosylated glucose oxidase of *Aspergillus niger* by a ferrocene-derivatised detergent (1099) 91
Fricaud, A.-C., Walters, A.J., Whitehouse, D.G. and Moore, A.L.
The role(s) of adenylate kinase and the adenylate carrier in the regulation of plant mitochondrial respiratory activity (1099) 253

Garlaschi, F.M., see Zucchelli, G. (1099) 163
Ghanotakis, D.F., see Bakou, A. (1099) 131
Grätzel, M., see Fraser, D.M. (1099) 91

Haddy, A., Dunham, W.R., Sands, R.H. and Aasa, R.
Multifrequency EPR investigations into the origin of the S_2-state signal at $g = 4$ of the O_2-evolving complex (1099) 25
Hanley, J.A., Kear, J., Bredenkamp, G., Li, G., Heathcote, P. and Evans, M.C.W.
Biochemical evidence for the role of the bound iron-sulphur centres A and B in NADP reduction by Photosystem I (1099) 152
Hassinen, I.E., see Raatikainen, M.J.P. (1099) 238
Hayashi, M., Miyoshi, T., Sato, M. and Unemoto, T.
Properties of respiratory chain-linked Na^+-independent NADH-quinone reductase in a marine *Vibrio alginolyticus* (1099) 145
Hayashi, M., see Unemoto, T. (1099) 170
Heathcote, P., Wyman, M., Carr, N.G. and Beddard, G.S.
Partial uncoupling of energy transfer from phycoerythrin in the marine cyanobacterium *Synechococcus* sp. WH7803 (1099) 267
Heathcote, P., see Hanley, J.A. (1099) 152
Hiltunen, J.K., see Raatikainen, M.J.P. (1099) 238
Hirota, M., Moriyama, T., Shimada, K., Miller, M., Olson, J.M. and Matsuura, K.
High degree of organization of bacteriochlorophyll *c* in chlorosome-like aggregates spontaneously assembled in aqueous solution (1099) 271
Hoff, A.J., see Kleinherenbrink, F.A.M. (1099) 175

Ikegami, I., see Maeda, H. (1099) 74
Inoue, Y., see Ono, T.-a. (1099) 185

Jackson, J.B., see Palmer, T. (1099) 157
Jennings, R.C., see Zucchelli, G. (1099) 163

Kear, J., see Hanley, J.A. (1099) 152
Kiviluoma, K.T., see Raatikainen, M.J.P. (1099) 238
Kleinherenbrink, F.A.M., Deinum, G., Otte, S.C.M., Hoff, A.J. and Amesz, J.
Energy transfer from long-wavelength absorbing antenna bacteriochlorophylls to the reaction center (1099) 175
Kleinherenbrink, F.A.M., see Deinum, G. (1099) 81
Kobayashi, M., see Maeda, H. (1099) 74
Kormer, S.S., see Mileykovskaya, E.I. (1099) 219
Kornblatt, J.A. and Kornblatt, M.J.
Cytochrome *c* oxidase: the presumptive channel holds at least four water molecules (1099) 182
Kornblatt, M.J., see Kornblatt, J.A. (1099) 182
Krippahl, G., see Lanyi, J.K. (1099) 102
Kubrina, L.N., Caldwell, W.S., Mordvintcev, P.I., Malenkova, I.V. and Vanin, A.F.
EPR evidence for nitric oxide production from guanidino nitrogens of L-arginine in animal tissues in vivo (1099) 233
Kwa, S.L.S., Newell, W.R., Van Grondelle, R. and Dekker, J.P.
The reaction center of Photosystem II studied with polarized fluorescence spectroscopy (1099) 193

Lanyi, J.K., Tittor, J., Váró, G., Krippahl, G. and Oesterhelt, D.
Influence of the size and protonation state of acidic residue 85 on the absorption spectrum and photoreaction of the bacteriorhodopsin chromophore (1099) 102
Larsson, U.K., see Carlberg, I. (1099) 111
Li, G., see Hanley, J.A. (1099) 152

Maeda, H., Watanabe, T., Kobayashi, M. and Ikegami, I.
Presence of two chlorophyll *a'* molecules at the core of Photosystem I (1099) 74
Malenkova, I.V., see Kubrina, L.N. (1099) 233
Malkin, S., see Braun, G. (1099) 57
Marzuki, S., see Noer, A.S. (1099) 123
Masson, K., see Oettmeier, W. (1099) 262
Matsuura, K., see Hirota, M. (1099) 271
Mileykovskaya, E.I., Kormer, S.S. and Allison, W.S.
Significant quantities of endogenous GDP and ADP are present on catalytic sites of the F_1-ATPase isolated from *M. lysodeikticus* in the absence of added nucleotides (1099) 219
Miller, M., see Hirota, M. (1099) 271
Mills, J.D., see Austin, P.A. (1099) 226
Miyoshi, T., see Hayashi, M. (1099) 145
Moore, A.L., see Fricaud, A.-C. (1099) 253
Mordvintcev, P.I., see Kubrina, L.N. (1099) 233
Moriyama, T., see Hirota, M. (1099) 271
Muijsers, A.O., see Van den Bogert, C. (1099) 118

Newell, W.R., see Kwa, S.L.S. (1099) 193
Noer, A.S., Marzuki, S. and Allison, W.S.
Antipeptide antibodies to the carboxy terminal and the DCCD binding region of the human mitochondrial ATP synthase β-subunit (1099) 123

Oesterhelt, D., see Lanyi, J.K. (1099) 102
Oettmeier, W., Masson, K. and Soll, M.
The acridones, new inhibitors of mitochondrial NADH:ubiquinone oxidoreductase (complex I) (1099) 262
Olson, J.M., see Hirota, M. (1099) 271
Ono, T.-a. and Inoue, Y.
Localization in Photosystem II of the histidine residue putatively responsible for thermoluminescence A_T-band as probed by trypsin accessibility (1099) 185
Otte, S.C.M., see Kleinherenbrink, F.A.M. (1099) 175

Palmer, T. and Jackson, J.B.
Nicotinamide nucleotide transhydrogenase from *Rhodobacter capsulatus*; the H^+/H^- ratio and the activation state of the enzyme during reduction of acetyl pyridine adenine dinucleotide (1099) 157
Pauly, S. and Witt, H.T.
Are there really four manganese ions per centre of photosynthetic water oxidation? (1099) 211
Pauly, S., Schlodder, E. and Witt, H.T.
The influence of salts on charge separation ($P680^+Q_A^-$) and water oxidation of Photosystem II complexes from thermophilic cyanobacteria. Active and inactive conformational states of Photosystem II (1099) 203
Peuhkurinen, K.J., see Raatikainen, M.J.P. (1099) 238
Pushkin, A.V., see Tsuprun, V.L. (1099) 67

Raatikainen, M.J.P., Peuhkurinen, K.J., Kiviluoma, K.T., Hiltunen, J.K. and Hassinen, I.E.
5'-Nucleotidase activity and adenosine production in rat liver mitochondria (1099) 238
Ross, I.S., see Austin, P.A. (1099) 226

Sands, R.H., see Haddy, A. (1099) 25
Sato, M., see Hayashi, M. (1099) 145
Schevchenko, E.V., see Bulychev, A.A. (1099) 16
Schlodder, E., see Pauly, S. (1099) 203
Sedgwick, E.G. and Bragg, P.D.
Differential permeability for lipophilic compounds in uncoupler-resistant cells of *Escherichia coli* (1099) 45
Sedgwick, E.G. and Bragg, P.D.
Mechanism of energization of uptake of the fluorescent dye 2-(4-dimethylaminostyryl)-1-ethylpyridinium cation [DMP^+] into an *acrA* strain of *Escherichia coli* (1099) 51
Shalgi, E., see Braun, G. (1099) 57
Shimada, H., see Unemoto, T. (1099) 170
Shimada, K., see Hirota, M. (1099) 271
Shipton, C.A. and Barber, J.
Characterisation of photoinduced breakdown of the D1-polypeptide in isolated reaction centres of Photosystem II (1099) 85
Soll, M., see Oettmeier, W. (1099) 262

Tagunova, I.V., see Tsuprun, V.L. (1099) 67
Tittor, J., see Lanyi, J.K. (1099) 102
Tsuprun, V.L., Boekema, E.J., Pushkin, A.V. and Tagunova, I.V.
Electron microscopy and image analysis of the *GroEL*-like protein and its complexes with glutamine synthetase from pea leaves (1099) 67

Ulstrup, J., see Christensen, H.E.M. (1099) 35
Unemoto, T., Shimada, H. and Hayashi, M.
Chemical structures critical for the induction of FMN-dependent NADH-quinone reductase in *Escherichia coli* (1099) 170
Unemoto, T., see Hayashi, M. (1099) 145

Van den Bogert, C., Dekker, H.L., Cornelissen, J.C., Van Kuilenburg, A.B.P., Bolhuis, P.A. and Muijsers, A.O.
Isoforms of cytochrome *c* oxidase in tissues and cell lines of the mouse (1099) 118
Van Grondelle, R., see Kwa, S.L.S. (1099) 193
Vanin, A.F., see Kubrina, L.N. (1099) 233
Van Kuilenburg, A.B.P., see Van den Bogert, C. (1099) 118
Váró, G., see Lanyi, J.K. (1099) 102
Vennigerholz, F., see Carlberg, I. (1099) 111
